Search Notes

Examiner Cuong,

Please find attached your search results.

Please let me know if you like for me to try a refocused search with a different strategy or additional terms.

Please take a few minutes to fill the attached Colored feedback form to the EIC.

Thanks,

Bode Akintola

Conference Date: 10 May 1998   Conference Location: Minneapolis, MN, USA
Language: English
Subfile: C

Abstract: Software agents help automate a variety of tasks including those involved in **buying** and **selling** products over the **Internet** . Although shopping agents provide convenience for **consumers** and yield more efficient markets, today's first- **generation** shopping agents are limited to comparing **merchant** offerings only on price instead of their full range of value. As such, they do a disservice to both **consumers** and retailers by hiding important merchant value-added **services** from **consumer** consideration. Likewise, the increasingly popular online auctions pit sellers against **buyers** in distributive negotiation tug-of-wars over price. This paper analyzes these approaches from economic...

... then proposes integrative negotiation as a more suitable approach to retail electronic commerce. Finally, we **identify** promising techniques (e.g., multi-attribute utility theory, distributed constraint satisfaction, and conjoint analysis) for...

 Title: **Who will buy integrated access** services ?
 Abstract: A tremendous amount of effort goes into second-guessing the **network** equipment and **service** **purchases** of business **customers** . Analysts routinely **generate** predictions designed to reassure **vendors** and **service** providers they are on the right marketing track. Such projections were difficult enough when **customers** were only choosing among a handful of IXC, value-added network suppliers, and computer or...
 ... more viable choices in virtually every purchase category, and blurred distinctions among the categories themselves. **Customers** have more choices, and more overlapping choices than ever. With integrated access, vendors and **service** providers seem to be counting on a fairly simple formula: cut their own costs by consolidating **customer** traffic flows, and offer integrated **services** for less money than **customers** pay for separately-accessed voice and **data** **services** . This seems more likely to attract smaller than larger business **customers** . The latter would probably prefer **service** providers to just cut prices for **data** **service** and private lines, rather than offering a new kind of **service** that may not connect easily to existing equipment.

Express Dairies plans to launch internet float
  UK: MILK FLOATS FOR INTERNET DELIVERIES?
Financial Times (FT)   01 May 2000 p.19
Language: ENGLISH

Express Dairies, the biggest UK-based dairy **products   supplier** , is
contemplating using its milk floats to **deliver   goods   purchase** on the
 internet . The company is having discussions with several e-commerce firms
and an agreement could be...

... books, clothes and video recorders, for example, and would undertake to
return unwanted and damaged **products** to manufacturers. It would probably
gain a fixed amount from the internet retailers for each delivery it makes.
With most milk floats making their deliveries early in the morning whilst
 customers   are still at home, it could avoid the difficulty faced by
internet retailers of finding **customers** are out when they try to deliver
goods .

PRODUCT NAMES: TimesTen (744484)

TITLE: In-Memory Databases Aid Web Customization
AUTHOR: Waltner, Charles

RECORD TYPE: Review
REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

REVISION DATE: 20000330

...CTO, Edmond Mesrobian, chose an in-memory database from TimesTen
Performance Software to personalize entertainment **information** and Web
pages for **customers** of the site, which sells music, movies, and games.
In-memory databases retrieve **data** much faster than conventional
disk-based databases because retrieval is not hampered by the slow process
of culling **information** from disk drives. In-memory databases meet the
increasing needs of Web **merchants** for quick, high-volume **data** **delivery**
 and can process all types of **transactions** and activities, including
shopping carts, personalized World Wide **Web** pages, and targeted banner
ads. TimesTen also provides an advanced way to process **data** in RAM,
replication abilities for copying, and synchronization of **data** for better
reliability. Most Web sites attempting to speed **data** retrieval and Web
page redraw use **data** caching, which leaves parts of the most relevant
data in RAM for quick retrieval by the Web server. However, even the most
advanced of...

...memory database has totally eliminated response speedbumps. Only a few
vendors, including Angara E-Commerce **Services** , Polyhedra, and TimesTen,
sell in-memory databases to Web companies, and vendors in the relational...

REVISION DATE: 19990730

Electronic commerce tools for the AS/400 computing platform can provide
users with paperless systems by providing more than electronic **data**
interchange (EDI) document support between large vendors. Instead of being
a useful but non-essential option, e-commerce is a trading feature that all
companies need. **Users** can develop, lease, or purchase e-commerce
software, but in most cases third- **party** e-commerce **products** are the
most versatile and come from **vendors** that provide maintenance agreements
and updates that support future needs. **Selecting** the right software can
be a complex and difficult task, because applications are multilayered,
based on whether the packages allow exchange of EDI- or **Web** -based
transactions . Therefore, upper management must concretely establish in
advance the e-commerce functions to be enabled. The chosen package has to
integrate with other installed or proposed Internet systems. **Users** have
to consider the compatibility of interfaces and **data** modification tools.
E-commerce requires a connection between trading partners, and therefore
communications software is...

...required. Tools should be menu-driven with drag-and-drop and other
graphical features, and **users** must also look into support for
international business, including the euro, multiple currencies, and
multiple...

...   commercialization, channel partners, and customers.
    To understand customer habits, increase penetration, and grow sales
opportunities, **distributors** provide point-of-sale information that's fed
into the warehouse. With consolidated direct and indirect sales detail, for
the first time people can get a comprehensive view of all **purchases** a
customer makes, from any business unit or **distributor** any where in the
world. Digitizing multimedia **product   information** expedites **customer
purchase** decisions without the traditional delays and inaccuracies, making
it easier for customers to **order** , **receive** , and pay for **products** .
Delivering detailed multimedia **product** information on the **Internet**
will also substantially increase sales growth.
    Business Benefits
    Implementing a **Web** warehouse that extends beyond the walls of 3M
has transformed 3M's business, giving customers...

Entertainment and Time - The Razor Blades of the 1980s.
Dvorak, J.C.
PC World, p43
Aug., 1985
ISSN: 0737-8939   LANGUAGE: ENGLISH   RECORD TYPE: ABSTRACT

ABSTRACT: **Vendors** of information **services** , such as CompuServe and The
Source, are sharply criticized for **selling** users disposable time at a
high bits-per-second (bps) price rather than efficiently providing them
with substantive **information** . The **user** pays connect time rather than
CPU time, as in the past. The usual stalls and **downloading** time become
very expensive and the information, when finally **delivered** , is
negligible. When viewed as **on - line** entertainment, however, these
services are seen in a more positive light.

...   goods."
    A similar service called eCash from DigiCash Inc. currently is being
tested on the **Internet** . That **service** uses electronic coins that a user
downloads into a wallet from a central database before going on an
Internet **buying** spree. Unlike NetBill, however, eCash can't verify
delivery of **goods** nor properly **identify**   **merchants** and **consumers** .
    Visa also has a standing agreement with Microsoft Corp. to develop
secure **transaction**   **services** for **online** sales. The NetBill **service**
will complement that agreement, according to Melancon.
    "They are both components of our strategy that...

  Claims

Claim
... or multiple financial products and services. In order to sell the
  product or service, the **suppliers** 1 1 5 must **generate** a plurality of
  advertisements 1 1 0. A typical consumer 105 is exposed to the...

...directly to the supplier 115 that is offering it. The supplier, in turn,
  uses personal **information** supplied by the **consumer** 105 to **request**
  and **receive** , the consuiner' credit report from the credit bureau 120.
  At this point the supplier 115...
...he wishes to receive offers for and this information also becomes part
  of the anonymous **information** profile 245.
  The intermediary 200, using both personal and anonymous **consumer**
   information , **requests** and **receives** a credit report on the **consumer**
   from a credit bureau 220. The credit report is purged of any personal
  information and placed in the **consumer** 's anonymous **information** file
  245. Each supplier 215 then has access to the **consumer** 's anonymous
  information 245 through the supplier homepage 240. In one embodiment of
  the present invention, the intermediary...are used by the intermediary
  330 1 5 in block 331 and block 334 to **request** and **receive** a credit
  report from a credit bureau (not shown). At block 333, the credit report
  is modified to remove all personal **information** that uniquely
  identifies the **consumer** to fortn an Anonymous Credit Profile (ACP).
  The inten--nediary 330 maintains all PIRs from...supplier is provided a
  supplier home page. Fig. 8 is an illustration of a computer **generated**
  display 800 seen by the **supplier** when sorting and grouping anonymous

consumer profiles in order to arrive at a selected subset...intermediary
forwards the offer to the consumer whose profile that the I 0 supplier
has **selected** .
ATS APPLICATIONS
The risk-based **services** can be distributed through the Internet,
world-wide web, wireless, mobile positioning wireless, local wireless...
...the supplier and/or on the amount of offer content viewed by the
consumer. All **products** may be **selected** to be available through the
ATS to their consumers or specific products to offer or specific
products to exclude call be **selected** based on any criteria. The ATS,
distributors or multiple levels of distributors may supply products...

...or may permit third-party suppliers to provide product directly to their
consumers and may **select** to offer only those **products** available
through the ATS system that they themselves or their third-party
suppliers do not...side-by-side, the consumer can calculate or display
additional costs, savings or profits by **selecting** alternative **products**
.
28
Offer terms and conditions and content can be saved for later viewing or
comparison...services 1040 and assembles the ATPs 1024 from the request
for offer 1006 and third **party information** 10 1 6. Fig. 12 shows a
self-service distributor configuration where the distributor 1004
receives request for offers 1006 from consumers I 000, generates third
party reports 10 1 6, and...may be made available through the ATS system
1002 to
consumers 1000 or specific advertisements, **products** or **services** may
be **selected** . Criteria 1032 may be **selected** that excludes
advertisements of specific **products** or services to consumers 1 000.
Advertisements maybe supplied directly to consumers or may be...be
implemented in a wireless system. Figs. 18-20 show
how a wireless system allows **suppliers** to **deliver** products and
services at the exact time and place the consumer is making a purchase...

Detailed Description
... computer network. The product data is identifies products that are available for purchase from a **merchant** . The placement of the order also includes **generating** an image based upon the product data. The image represents the products that are available for purchase. The placement of

the **order** further includes **receiving** a **product** **selection** from a
customer that **identifies** one of the products that are available for
purchase. The placement of the **order** ftirther includes **receiving**
paper curreney from the customer as payment for the **product** **selection**
. The placement of the order flirther --includes generating a
representation of the paper currency and...

Claim
... wherein the product data is associated with products that are
available for purchase from a **merchant** ; 1 **generating** an image based
upon the product data, wherein the image represents the
products that are available for **purchase** ;
 receiving at least one **product** **selection** from a **customer** that
identifies one of the
products that are available for **purchase** ;
, **receiving** paper currency from the customer as payment for the at least
one **product**
 selection ; 4
generating a representation of the paper currency; and
detemuning a value of the paper...

  Detailed Description

Detailed Description
... based supply chains and more particularly to affording market space
    interface between a plurality of **manufacturers** and service providers in
    a network-based supply chain environment.

    BACKGROUND OF THE INVENTION
    The...with a preferred embodiment;
    Figure 17 shows a block diagram of the Customer Quality of **Service**
    Management Process in
    accordance with a preferred embodiment;
    Figure 18 is a flowchart illustrating a...one embodiment of the present
    invention for creating a hierarchy of the features of the **items**
    selected in accordance with the customer's profile; Figure 58 is an
    illustration of one embodiment...58
    While the PSTN was growing in feature functionality as well as traffic
    demand, new **data** networks have been created to support the
    inter-networking of computing devices. These **data** networks provide
    interconnection to geographically dispersed computing devices at va
    'nglevelsoftransmissionbandwidth(e.g.56/64K,T-I/E-1,T-3/E-3,OC-3/STM-1).

    ryi
    The **data** networks consist of many technologies e.g. SMDS, ATM,
    frame-relay and IP.

    In some cases, these **data** networks themselves are parallel networks, in
    other cases, they share a common technology in the...

Claim
... detailed information on an identified product item, service item, or
  bundle of two or more **items** **selected** from a group of **product** **items**
    and service items
  to a purchaser to use to identify a **selected** **item** ,
  program code for receiving a request from said purchaser to receive bids
  to sell said
    selected **item** ,
  program code for obtaining at least one bid from a vendor to sell said
  selected **item** ,
  97
  and
  program code for submitting said bid to said purchaser. 311. A method for
  procurement using a computer that communicates over a network, the method
  comprisingproviding **information** on a collection of items and vendors to .
  a **purchaser** ,
    receiving a **purchaser** 's selection of two or more vendors,
  receiving a set of customer-defined attributes from vendors,
  receiving bids from at least two of said **vendors** ,
    delivering said bids to said purchaser, and
  processing a negotiation between said purchaser and said vendors...

...311 wherein.I I said bid comprises an option for said vendor to sell
  said **selected** **item** to another purchaser for a price higher than
  stated in said bid.
  I 3 13...

...said option specifying a time period at the expiration of which the sale
  of said **selected** **item** to said purchaser shall be consummated, that
  before said expiration seller may sell said **selected** **item** to another
  purchaser for a price higher than stated in said bid, and that if said
  selected **item** is sold to said another purchaser, said vendor shall pay
  a penalty sum to said...
...said one or more processor devices, one or more network interfaces
  adapted to send and **receive** **data** to and from
  purchaser nodes and vendor nodes on a network,
  wherein at least one of the processors and memory devices make available
  to a **purchaser** node **information** about a collection of items and
  vendors to a **purchaser** , and wherein when the system **receives** a
  selection of two or more vendors and a set of purchaserdefined attributes
  from said...

...a computer that communicates over a network, the program instructions
  comprising: program code for providing **information** on a collection of
  items and vendors to a
  purchaser ,
  program code for **receiving** a **purchaser** 's selection of two or more
  vendors, program code for receiving a set of customer...

...presenting said customer-defined attributes to said vendors,
program code for receiving bids from said **vendors** ,
program code for **delivering** said bid to said purchaser, and
I program code for processing a negotiation between said...

...each said item identified by a set of item features, maintaining a list
of said **identified** items in an index of **individual** product items and
individual service items,
99
receiving from one of a plurality of **purchasers** a **request** to **receive**
bids to **sell** one of said individual product and service items, said
request including a set of item...

...item attributes with said item features for responsiveness to said
I I request,
1 2 **selecting** at least one **selected** **item** from said list as being
responsive to said request, 1 3 providing at least one...

...to said purchaser, said bid from one of said plurality of
sellers to sell said **selected** **item** , and
1 5 conducting a reciprocally active bidding negotiation between said
purchaser and said seller...

...of claim ') 18 wherein'. said bid comprises an option for said vendor to
sell said **selected** **item** to another purchaser for a price higher than
stated in said bid.
320. The method...
...of said selected purchaser shall be consummated, that before said
expiration seller may sell said
 Item to sal
 selected **item** to another purchaser for a price higher than stated in
said bid, and that if said **selected** **item** is sold to said another
purchaser,@said vendor shall pay a penalty sum to said...materials
management (e.g., inventory and quality control).
342. The method of claim 318 including:
 selecting a plurality of **items** from said list as being responsive to
said request,
providing said plurality of bids to...

...items and individual service iterns,
one or more network interfaces adapted to send and receive **data** to and
from
 customer nodes and vendor nodes, and
one or more processors in communication with the memory,
wherein, when the one or more network interfaces **receives** a **request**
from one of a I I plurality of customer nodes to receive bids to sell...

...said
processors compare sal n attributes with said item features for
responsiveness 1 4 request, **select** at least one **selected** **item** from
said list as being responsive to said request, and 1 5 submit that item
to that customer node in the form of an offer to sell the **selected**
item , and
104
the one or more processors process a reciprocally active bidding
negotiation between 1 features, program code for maintaining a list of
said **identified** items in an index of **individual**
product items and **individual** service items,
program code for receiving from one of a plurality of **purchasers** a

request to **receive** bids to **sell** one of said individual product and
service items, said request including a set of
item...

...said item attributes with said item features for
responsiveness to said request,
program code for **selecting** at least one **selected** **item** from said
list as being responsive
to said request,
1 5 program code for providing at least one bid to said purchaser, said
bid to sell said
selected **item** , and
program code for conducting a reciprocally active bidding negotiation
between said 1 8 purchaser...

  assessment. Assessment team members, assessment participants, and areas
  to be assessed are **selected** . Work **products** are identified for initial
  review, and the logistics for the on-site visit are identified...of
  receipt and how is it determined?
Base Practice: 1 3 Incident/Request Qualification
Do **Service** Desk personnel have access to a catalogue/database of
frequently occurring incidents and their
solutions...drafted for each user group. The draft SLA will drive the
process of identifying and **selecting** suppliers to support the **service**
requirements. The SLA should not be finalized unti I suppliers have been
found to support...external supplier is a hardware or software vendor.

BP Number 1 4
BP Name Finalize **service** suppliers
BP Description A final **selection** of suppliers should be conducted. This
selection should be based on finding the supplier that best suits the
needs of the organization. Areas that should be examined in **selecting**
service suppliers include cost, training requirements, tools required,
physical requirements, installation requirements, and; review and control
...exists that
shows other suppliers were evaluated.

1 4 Finalize service Team can explain how **service** supplier was
suppliers **selected** , what criteria was used to finalize
decision, etc.

1 5 Prepare OLAs An OLA between...to determine what type of contractual
terms they would consider?
Base Practice- 1 4 Finalize **Service** Suppliers
What **selection** criteria (e.g. cost, training requirements, tools

Bode Akintola05-Dec-03

required) are considered when
choosing the service providers...to identify potential service providers
that could meet
the operational requirements?
Is analysis undertaken to **select** **service** providers ftorn the pool of
candidates?
For each service provider, is an OLA prepared and...

  updating/accessing product **information** . For instance,
  small distributors or **individual** vendors may operate
  through a secure web site to update their product
  information, **receive** **order** information from the
  transaction processor of the present invention, and
  provide shipping/tracking information of their products
  1 5...

...be described in detail
  hereinafter to select a distributor to fill the order for
  a **selected** **product** using real-time data at the time of
  purchase. In this way, prices of the...

...the present invention is comprised of four basic sub
  systems: Fraud Detection 310, Credit Card **Services** 320,
  Distributor **Selection** 330, and Customer **Service** 340. The
  overall functionality of the Order Processing System 30
  is described hereinafter.
  When an order for a **selected** **product** is received,
  the Order Processing System 30 first determines whether
  the order is a valid...receives the order information such as credit card
  information, billing address, shipping address, quantity
  of **selected** productsf sales prices of the **products** , etc.
  This order information is initially passed through the
  Fraud Detection sub-system 310.
  The...methods.
  Preferably, as shown in Figure 4, when an order is
  received by the Distributor **Selection** sub-system 330, the
  product information such as the product SKU (i.e., Stock
  Keeping Unit) number and quantity is...

...fill the order.
  For example, the rules for selecting a distributor
  may be set to **select** the distributor providing the
  product with the maximum profit margin or within a range
  of margins. Alternatively, the rules may...

...the maximum profit margin but only has
  ground shipping available that may take weeks for
  delivery but another **distributor** provides next-day
  delivery with a lesser profit margin and the customer
  indicated speedy **delivery** , then the second **distributor** is
  selected since the first distributor, although providing
  the maximum profit margin, cannot fulfill the...

...newsletters, promotional offers,
exclusive sales, coupons and incentive, etc. Moreover,
this periodic feedback to the **customer** can be highly
30 personalized based on the **information** stored in the
Customer Database 710 such as the **customer** 's buying
patterns.
Payment Processing System
The Payment Processing System 40 **receives** **order** /RMA
information from the **Order** Processing System 30 in
conjunction with the payment method information. For
credit card orders, the...The customer selects the product or products
and the
Online Shopping System 20 places the **selected** **products** in
an electronic shopping cart.
At the time of checkout, the customer is asked to...

...The rest of the failed orders are placed in
the Fraud Database 730.
The Distributor **Selection** sub-system 330 sends the
product information (i.e., SKU and quantity) to each of
the distributors such as independent pick...

...sub-system 330
then selects the distributor with, for example, the
highest margin or other **selected** criteria for particular
products and forwards the order electronically. once the
distributor fills the order, the **Customer** Service sub
system 340 either **receives** or retrieves the **order**
information such as the **customer** number, warehouse
number, shipment date, shipment tracking **information** ,
invcice amounts, etc.
Customer Service sub-system 40 ema ls the customer
within minutes after a valid **order** is **received** with a
confirmation number. The Customer Service sub-system 340
emails the customer again when...electronic
transaction processor for automating and facilitating
retail sale of ones of a plurality of **selected** **products**
5 to retail customers directly from a plurality of
supplie

rs of said products comprising...

Detailed Description
... information the customer requires for making a decision. If the user
decides to purchase a **product** or **service**, a merchant is **selected** at
330, then a **product** is **selected** at 340. From this point merchant
fulfillment may be handled in one of many ways...

...authorized and if positive, as with merchants offering open terms, a
purchase order will be **generated** and transmitted to the **merchant** and
any transaction information will be stored in the customer transactions
database or, a customer...

...transferred from the merchants to the inventive system either by an
electronic data or media **transfer**.

All merchant and **transaction** data **received** by system 390 will undergo
such processes as receipt confirmation, verification, matching and
sorting of registration and fulfillment data. Upon completion of **data**
processing operations, this transaction **data** is then stored in the
customer/owner registration and transactions database 500. The customer
may at this point either exit the...
